

TopResponse Threat Advisory

Release Date: October 18, 2011.

Purpose: The Corero TopResponse team informs customers that existing IPS 5500 security features provide proactive protection against known attacks targeting the Microsoft Windows Media Center Insecure Library Loading Vulnerability (MS11-076,CVE-2011-2009).

Corero Products: Top Layer IPS 5500 and later.

Vulnerable Infrastructure: Microsoft Windows Vista SP2, Microsoft Windows Vista x64 Edition SP2, Microsoft Windows 7 for 32-bit Systems and Windows 7 for 32-bit Systems SP1, Microsoft Windows 7 for x64-based Systems and Windows 7 for x64-based Systems SP1, Microsoft Windows Media Center TV Pack for Windows Vista (32-bit editions), and Microsoft Windows Media Center TV Pack for Windows Vista (64-bit editions).

Alert Type: Critical Vulnerability

Risk Assessment: Critical

Threat Impact: Remotely exploitable vulnerability that could allow an attacker to control vulnerable systems

Advisory Impact: Prevention

Summary: Microsoft Windows Media Center contains a shared component that is vulnerable to DLL Hijacking. The reported vulnerability could allow a remote attacker to execute arbitrary code on the vulnerable infrastructure components by opening a specially crafted e-mail or visiting a specially crafted web site, which causes vulnerable systems to attempt to download a file from an external system using either the WebDAV or the Microsoft RPC protocol. The IPS 5500 provides proactive protection against known attacks targeting this vulnerability.

Recommended Action: Corero recommends the following actions:

Ensure that the rule tln-102004, “AAUPV: HTTP Method Name Matches Specified Filter”, is enabled in the IPS Rule Set that is used to inspect traffic sent to your Microsoft Windows infrastructure. The rule is currently enabled in the “Strict Server Protection” IPS Rule Set.
