

## Threat Update Service\* Advisory

### Protection Pack 2013-11-25-01 Released November 25, 2013

**Purpose:** The Corero Security Active Response Team has issued this Prevention Advisory to protect customers against potential attacks targeting the Adobe Flash Player CVE-2013-5324 Memory Disclosure Vulnerability.

**Issue:** A memory disclosure vulnerability exists in the Adobe Flash Player. This could allow an attacker to execute arbitrary code on the victim's machine by enticing the victim to open a specially crafted SWF file. An attacker who successfully exploited this vulnerability could take complete control of an affected system.

**Recommended Action:** Apply the specified protection pack (or any later one) and ensure the associated rule is used to inspect traffic to the affected product infrastructure.

<b>Issue Identifier</b>	CVE-2013-5324
<b>Advisory</b>	<a href="http://www.adobe.com/support/security/bulletins/apsb13-21.html">http://www.adobe.com/support/security/bulletins/apsb13-21.html</a>
