

Threat Update Service* Advisory
Protection Pack 2014-01-31-01 Released January 31, 2014

Purpose: The Corero Security Active Response Team has issued this Prevention Advisory to protect customers against potential attacks targeting the Adobe Flash Player CVE-2013-5330 Memory Corruption Vulnerability.

Issue: A memory corruption vulnerability exists in the Adobe Flash Player. This could allow an attacker to execute arbitrary code on the affected system via a specially crafted SWF file.

Recommended Action: Apply the specified protection pack (or any later one) and ensure the associated rule is used to inspect traffic to the affected product infrastructure.
