

Threat Update Service* Advisory
Protection Pack 2014-04-08-02 Released April 8, 2014

Purpose: The Corero Security Active Response Team has issued this Prevention Advisory to protect customers against potential attacks targeting the Adobe Flash Player CVE-2014-0507 Stack Buffer Overflow Vulnerability.

Issue: A stack buffer overflow vulnerability exists in the Adobe Flash Player. This could allow an attacker to execute arbitrary code on the victim’s machine by enticing the victim to open a specially crafted SWF file. An attacker who successfully exploited this vulnerability could take complete control of an affected system.

Recommended Action: Apply the specified protection pack (or any later one) and ensure the associated rule is used to inspect traffic to the affected product infrastructure.

Issue Identifier	CVE-2014-0507
Advisory	http://helpx.adobe.com/security/products/flash-player/apsb14-09.html
Risk Assessment	Critical Vulnerability
Threat Impact	Remotely exploitable vulnerability that could allow an attacker to execute arbitrary code on an unprotected system.
Affected Products	Adobe Flash Player 12.0.0.77 on Windows
