

Threat Update Service* Advisory
Protection Pack 2014-05-01-01 Released May 2, 2014

Purpose: The Corero Security Active Response Team has issued this Prevention Advisory to protect customers against known attacks targeting the Adobe Flash Player CVE-2014-0515 Buffer Overflow Vulnerability.

Issue: A buffer overflow vulnerability exists in the Adobe Flash Player. This could allow an attacker to execute arbitrary code on the victim’s machine by enticing the victim to open a specially crafted SWF file. An attacker who successfully exploited this vulnerability could take complete control of an affected system.

Recommended Action: Apply the specified protection pack (or any later one) and ensure the associated rule is used to inspect traffic to the affected product infrastructure.

Issue Identifier	CVE-2014-0515
Advisory	http://helpx.adobe.com/security/products/flash-player/apsb14-13.html
Risk Assessment	Critical Vulnerability
Threat Impact	Remotely exploitable vulnerability that could allow an attacker to execute arbitrary code on an unprotected system.
