

Threat Update Service* Advisory

Protection Pack 2016-07-08-01 Released July 22, 2016

Purpose: The Corero Security Active Response Team has issued this Prevention Advisory to protect customers against known attacks targeting the Adobe Flash Player CVE-2015-0347 denial of service vulnerability.

Issue: A denial of service vulnerability exists in the Adobe Flash Player. This could allow attackers to corrupt memory via unspecified vectors.

Recommended Action: Apply the specified Protection Pack (or any later one) and ensure the associated rule is used to inspect traffic to the affected product infrastructure.

Issue Identifier	CVE-2015-0347
Advisory	https://helpx.adobe.com/au/security/products/flash-player/apsb15-06.html
Risk Assessment	Critical vulnerability
Threat Impact	Allows attackers to execute arbitrary code via unspecified vectors.
Affected Products	This denial of service vulnerability in Adobe Flash Player before 13.0.0.281 and 14.x through 17.x before 17.0.0.169 on Windows and OS X and before 11.2.202.457 on Linux allows attackers to corrupt memory via unspecified vectors.
Corero Products	IPS 5500 EC-Series and IPS 5500 ES-Series v6.60 (build 047 and later), v6.61 (build 021 and later), v6.80 (build 035 and later), v6.82 (build 003 and later).
Associated Rule	tln-025345
Associated Rule Set	This rule is automatically enabled in the "Recommended Server Protection" rule set.
