

Threat Update Service* Advisory **Protection Pack 2012-07-20-02 Released July 24, 2012**

Purpose: The Corero Security Active Response Team has issued this Prevention Advisory to protect customers against potential attacks targeting the Adobe Photoshop Collada Asset Elements Buffer Overflow Vulnerability.

Issue: A stack buffer overflow vulnerability exists in Adobe Photoshop. This could allow an attacker to execute arbitrary code on the remote machine by enticing the victim to open a specially crafted .DAE file. An attacker who successfully exploited this vulnerability could take complete control of an affected system.

Recommended Action: Apply the specified protection pack (or any later one) and ensure the associated rule is used to inspect traffic to the affected product infrastructure.

Issue Identifier	CVE-2012-2052
Vendor Advisory	http://www.adobe.com/support/security/bulletins/apsb12-11.html
