

Threat Update Service* Advisory
Protection Pack 2014-05-16-01 Released May 16, 2014

Purpose: The Corero Security Active Response Team has issued this Prevention Advisory to protect customers against known attacks targeting the Adobe Reader CVE-2014-0512 Security Bypass Vulnerability.

Issue: A security bypass vulnerability exists in the Adobe Reader. This could allow an attacker to bypass sandbox restrictions on the victim's machine and execute code outside the context of the sandbox.

Recommended Action: Apply the specified Protection Pack (or any later one) and ensure the associated rule is used to inspect traffic to the affected product infrastructure.

Issue Identifier	CVE-2014-0512
Advisory	http://helpx.adobe.com/security/products/reader/apsb14-15.html
Risk Assessment	Critical Vulnerability
Threat Impact	Remotely exploitable vulnerability that could allow an attacker to execute arbitrary code on an unprotected system.
