

Threat Update Service* Advisory
Protection Pack 2013-05-03-01 Released May 3, 2013

Purpose: The Corero Security Active Response Team has issued this Prevention Advisory to protect customers against known attacks targeting the Aspen Directory Traversal Vulnerability.

Issue: A directory traversal vulnerability exists in Aspen as it does not properly sanitize user supplied input. This could allow an attacker to gain access to sensitive information on an affected system.

Recommended Action: Apply the specified protection pack (or any later one) and ensure the associated rule is used to inspect traffic to the affected product infrastructure.
