

**Threat Update Service\* Advisory**  
**Protection Pack 2013-05-28-01 Released May 28, 2013**

**Purpose:** The Corero Security Active Response Team has issued this Prevention Advisory to protect customers against known attacks targeting the BigAntSoft BigAnt IM Server DDNF Username Buffer Overflow Vulnerability.

**Issue:** A buffer overflow vulnerability exists in the expsrv.dll library in the BigAntSoft BigAnt IM Server. This could allow an attacker to execute arbitrary code on the system and possibly take complete control of an affected system.

**Recommended Action:** Apply the specified protection pack (or any later one) and ensure the associated rule is used to inspect traffic to the affected product infrastructure.

<b>Issue Identifier</b>	BID: 58998
<b>Advisory</b>	<a href="http://www.securityfocus.com/bid/58998">http://www.securityfocus.com/bid/58998</a>
