

Threat Update Service* Advisory Protection Pack 2013-05-30-02 Released May 31, 2013

Purpose: The Corero Security Active Response Team has issued this Prevention Advisory to protect customers against known attacks targeting the HP Intelligent Management Center Arbitrary File Upload Vulnerability.

Issue: A file upload vulnerability exists in the HP Intelligent Management Center. This could allow an attacker to execute arbitrary code on the victim's machine. An attacker who successfully exploited this vulnerability could possibly take complete control of an affected system.

Recommended Action: Apply the specified protection pack (or any later one) and ensure the associated rule is used to inspect traffic to the affected product infrastructure.

Issue Identifier	CVE-2012-5201
Advisory	https://h20566.www2.hp.com/portal/site/hpsc/public/kb/docDisplay?docId=emr_na-c03689276
Risk Assessment	Important Vulnerability
Threat Impact	Remotely exploitable vulnerability that could allow an attacker to possibly gain full control of an unprotected system.
Affected Products	HP Intelligent Management Center (iMC) Intelligent Management Center for Automated Network Manager (ANM) before 5.2 E0401
Corero Products	IPS 5500 E-Series and later.
Associated Rule	tIn-025177
