

**Threat Update Service\* Advisory**  
**Protection Pack 2013-08-30-02 Released August 30, 2013**

**Purpose:** The Corero Security Active Response Team has issued this Prevention Advisory to protect customers against known attacks targeting the HP StorageWorks P4000 Virtual SAN Appliance Buffer Overflow Vulnerability.

**Issue:** A buffer overflow vulnerability exists in the HP LeftHand Virtual SAN Appliance. This could allow an attacker to execute arbitrary code on the victim's machine via a specially crafted packet. An attacker who successfully exploited this vulnerability could take complete control of an affected system.

**Recommended Action:** Apply the specified protection pack (or any later one) and ensure the associated rule is used to inspect traffic to the affected product infrastructure.
