

Threat Update Service* Advisory November 13, 2013

Purpose: The Corero Security Active Response Team informs customers that the IPS 5500 has proactive coverage against attacks targeting the Microsoft IE Information Disclosure Vulnerability.

Issue: An information disclosure vulnerability exists in Microsoft Internet Explorer because it does not properly handle web content when generating print previews. This could allow an attacker to gather sensitive information from any page that the victim is viewing.

Recommended Action: Enable the specified rule and ensure that the rule is used to inspect traffic to the affected product infrastructure.

Issue Identifier	CVE-2013-3908, MS13-088
Advisory	http://technet.microsoft.com/en-us/security/bulletin/ms13-088
