

## **Threat Update Service\* Advisory**

### **Protection Pack 2013-01-02-02 Released January 2, 2013**

**Purpose:** The Corero Security Active Response Team has issued this Prevention Advisory to protect customers against known attacks targeting the Microsoft Internet Explorer CDwnBindInfo Object Use-After-Free Vulnerability.

**Issue:** Internet Explorer tries to access an object that has not been initialized or has been deleted thereby corrupting system memory. This could allow an attacker to execute arbitrary code on the victim's machine by enticing the victim to open a specially crafted website. An attacker who successfully exploited this vulnerability could take complete control of an affected system.

**Recommended Action:** Apply the specified protection pack (or any later one) and ensure the associated rule is used to inspect traffic to the affected product infrastructure.

<b>Issue Identifier</b>	CVE-2012-4792
<b>Vendor Advisory</b>	<a href="http://technet.microsoft.com/en-us/security/advisory/2794220">http://technet.microsoft.com/en-us/security/advisory/2794220</a>
<b>Risk Assessment</b>	Critical Vulnerability
<b>Threat Impact</b>	Remotely exploitable vulnerability that could allow an attacker to gain full control of an unprotected system.
<b>Affected Products</b>	Internet Explorer 6 Internet Explorer 7 Internet Explorer 8
<b>Corero Products</b>	IPS 5500 E-Series and later.
<b>Associated Rule</b>	tln-106564
<b>Associated Rule Set</b>	This rule is automatically enabled in the "Recommended Client Protection" rule set.
