

**Threat Update Service\* Advisory**  
**Protection Pack 2014-07-17-02 Released July 18, 2014**

**Purpose:** The Corero Security Active Response Team has issued this Prevention Advisory to protect customers against known attacks targeting the Microsoft Internet Explorer CVE-2013-5045 Security Bypass Vulnerability.

**Issue:** Internet Explorer improperly validates permissions when installing files. This could allow an attacker to gain elevated privileges on the victim’s machine by enticing the victim to open a specially crafted website.

**Recommended Action:** Apply the specified Protection Pack (or any later one) and ensure the associated rule is used to inspect traffic to the affected product infrastructure.

<b>Issue Identifier</b>	CVE-2013-5045, MS13-097
<b>Advisory</b>	<a href="http://technet.microsoft.com/en-us/security/bulletin/ms13-097">http://technet.microsoft.com/en-us/security/bulletin/ms13-097</a>
