

Threat Update Service* Advisory

June 10, 2014

Purpose: The Corero Security Active Response Team informs customers that the IPS 5500 has proactive coverage against attacks targeting the Microsoft Internet Explorer CVE-2014-1797 Memory Corruption Vulnerability.

Issue: Internet Explorer tries to improperly access an object in memory thereby corrupting system memory. This could allow an attacker to execute arbitrary code on the victim's machine by enticing the victim to open a specially crafted website. An attacker who successfully exploited this vulnerability could take complete control of an affected system.

Recommended Action: Enable the specified rule and ensure that the rule is used to inspect traffic to the affected product infrastructure.

Issue Identifier	CVE-2014-1797, MS14-035
Advisory	http://technet.microsoft.com/en-us/security/bulletin/ms14-035
Risk Assessment	Critical Vulnerability
