

Threat Update Service* Advisory

Protection Pack 2012-09-25-02 Released September 25, 2012

Purpose: The Corero Security Active Response Team has issued this Prevention Advisory to protect customers against attacks targeting the Microsoft Internet Explorer execCommand Use-After-Free Vulnerability.

Issue: Internet Explorer tries to access an object that has been deleted thereby corrupting system memory. This could allow an attacker to execute arbitrary code on the victim's machine by enticing the victim to open a specially crafted website. An attacker who successfully exploited this vulnerability could take complete control of an affected system.

Recommended Action: Apply the specified protection pack (or any later one) and ensure the associated rule is used to inspect traffic to the affected product infrastructure.

Issue Identifier	CVE-2012-4969, MS12-063
Vendor Advisory	http://technet.microsoft.com/security/bulletin/MS12-063
