

Threat Update Service* Advisory
Protection Pack 2013-09-11-01 Released September 11, 2013

Purpose: The Corero Security Active Response Team has issued this Prevention Advisory to protect customers against potential attacks targeting the Microsoft Office CVE-2013-3158 Memory Corruption Vulnerability.

Issue: Microsoft Office and Microsoft Excel try to improperly access an object in memory thereby corrupting system memory. This could allow an attacker to execute arbitrary code on the victim's machine by enticing the victim to open a specially crafted file. An attacker who successfully exploited this vulnerability could take complete control of an affected system.

Recommended Action: Apply the specified protection pack (or any later one) and ensure the associated rule is used to inspect traffic to the affected product infrastructure.

Issue Identifier	CVE-2013-3158, MS13-073
Advisory	http://technet.microsoft.com/en-us/security/bulletin/ms13-073
Risk Assessment	Critical Vulnerability
Threat Impact	Remotely exploitable vulnerability that could allow an attacker to gain full control of an unprotected system.
Affected Products	Microsoft Excel 2003 Service Pack 3 Microsoft Excel 2007 Service Pack 3
