

Threat Update Service* Advisory

Protection Pack 2014-11-12-01 Released November 12, 2014

Purpose: The Corero Security Active Response Team has issued this Prevention Advisory to protect customers against potential attacks targeting the Microsoft Office CVE-2014-6335 Remote Code Execution Vulnerability.

Issue: Microsoft Word improperly handles objects in memory thereby corrupting system memory. This could allow an attacker to execute arbitrary code on the victim's machine by enticing the victim to open a specially crafted document. An attacker who successfully exploited this vulnerability could take complete control of an affected system.

Recommended Action: Apply the specified Protection Pack (or any later one) and ensure the associated rule is used to inspect traffic to the affected product infrastructure.
