

Threat Update Service* Advisory **Protection Pack 2013-03-14-01 Released March 14, 2013**

Purpose: The Corero Security Active Response Team has issued this Prevention Advisory to protect customers against potential attacks targeting the Microsoft OneNote Buffer Size Validation Vulnerability.

Issue: Microsoft OneNote does not properly handle memory when parsing specially crafted OneNote files because of an issue with validation of the buffer size. This could allow an attacker to read arbitrary data in memory.

Recommended Action: Apply the specified protection pack (or any later one) and ensure the associated rule is used to inspect traffic to the affected product infrastructure.

Issue Identifier	CVE-2013-0086, MS13-025
Vendor Advisory	http://technet.microsoft.com/security/bulletin/MS13-025
Risk Assessment	Important Vulnerability
Threat Impact	Remotely exploitable vulnerability that could allow an attacker to gain access to sensitive information.
Affected Products	Microsoft OneNote 2010 Service Pack 1 (32-bit and 64-bit Editions)
Corero Products	IPS 5500 E-Series and later.
Associated Rule	tln-106602
Associated Rule Set	This rule is automatically enabled in the "Recommended Client Protection" rule set.
