

## **Threat Update Service\* Advisory**

### **Protection Pack 2012-12-14-02 Released December 14, 2012**

**Purpose:** The Corero Security Active Response Team has issued this Prevention Advisory to protect customers against potential attacks targeting the Microsoft Windows DirectPlay Heap Overflow Vulnerability.

**Issue:** Windows DirectPlay does not properly parse office documents. This could allow an attacker to execute arbitrary code on the victim's machine. An attacker who successfully exploited this vulnerability could take complete control of an affected system.

**Recommended Action:** Apply the specified protection pack (or any later one) and ensure the associated rule is used to inspect traffic to the affected product infrastructure.
