

## **Threat Update Service\* Advisory**

### **Protection Pack 2013-02-14-04 Released February 14, 2013**

**Purpose:** The Corero Security Active Response Team has issued this Prevention Advisory to protect customers against potential attacks targeting the Microsoft Windows Media Decompression Vulnerability.

**Issue:** Microsoft DirectShow does not properly handle specially crafted media content. This could allow an attacker to execute arbitrary code on the victim's machine by enticing the victim to open a specially crafted media file, a document with specially crafted embedded media or receive specially crafted streaming content. An attacker who successfully exploited this vulnerability could take complete control of an affected system.

**Recommended Action:** Apply the specified protection pack (or any later one) and ensure the associated rule is used to inspect traffic to the affected product infrastructure.

<b>Issue Identifier</b>	CVE-2013-0077, MS13-011
<b>Vendor Advisory</b>	<a href="http://technet.microsoft.com/security/bulletin/MS13-011">http://technet.microsoft.com/security/bulletin/MS13-011</a>
<b>Risk Assessment</b>	Critical Vulnerability
<b>Threat Impact</b>	Remotely exploitable vulnerability that could allow an attacker to gain full control of an unprotected system.
<b>Affected Products</b>	Windows XP Service Pack 3 Windows XP Professional x64 Edition Service Pack 2 Windows Server 2003 Service Pack 2 Windows Server 2003 x64 Edition Service Pack 2 Windows Server 2003 with SP2 for Itanium-based Systems Windows Vista Service Pack 2 Windows Vista x64 Edition Service Pack 2 Windows Server 2008 for 32-bit Systems Service Pack 2 Windows Server 2008 for x64-based Systems Service Pack 2 Windows Server 2008 for Itanium-based Systems Service Pack 2
<b>Corero Products</b>	IPS 5500 E-Series and later.
<b>Associated Rule</b>	tln-106589
<b>Associated Rule Set</b>	This rule is automatically enabled in the "Recommended Client Protection" rule set.
