Threat Update Service* Advisory

Protection Pack 2014-10-20-02 Released October 20, 2014

Purpose: The Corero Security Active Response Team has issued this Prevention Advisory to protect customers against known attacks targeting the Microsoft Windows OLE Package Manager Code Execution Vulnerability.

Issue: Windows OLE does not properly process files with embedded OLE objects. This could allow an attacker to execute arbitrary code on the victim's machine by enticing the victim to open a specially crafted file. An attacker who successfully exploited this vulnerability could take complete control of an affected system.

Recommended Action: Apply the specified Protection Pack (or any later one) and ensure the associated rule is used to inspect traffic to the affected product infrastructure.

Issue Identifier	CVE-2014-4114, MS14-060
Advisory	http://technet.microsoft.com/en-us/security/bulletin/ms14-060
Risk Assessment	Critical Vulnerability
Threat Impact	Remotely exploitable vulnerability that could allow an attacker to execute arbitrary code on an unprotected system.
Affected Products	Windows Vista Windows Server 2008 Windows 7 Windows Server 2008 R2 Windows 8 and Windows 8.1 Windows Server 2012 and Windows Server 2012 R2 Windows RT and Windows RT 8.1
Corero Products	IPS 5500 EC-Series and IPS 5500 ES-Series v6.60 (build 047 and later), v6.61 (build 021 and later), v6.80 (build 035 and later), v6.82 (build 003 and later).
Associated Rule	tln-106956
Associated Rule Set	This rule is automatically enabled in the "Recommended Client Protection" rule set.
