

Threat Update Service* Advisory

Protection Pack 2012-10-19-02 Released October 19, 2012

Purpose: The Corero Security Active Response Team has issued this Prevention Advisory to protect customers against potential attacks targeting the Microsoft Word PAPX Section Corruption Vulnerability.

Issue: Microsoft Word does not properly handle memory operations when parsing Word files thereby corrupting system memory. This could allow an attacker to execute arbitrary code on the victim's machine by enticing the victim to open a specially crafted document. An attacker who successfully exploited this vulnerability could take complete control of an affected system.

Recommended Action: Apply the specified protection pack (or any later one) and ensure the associated rule is used to inspect traffic to the affected product infrastructure.

Issue Identifier	CVE-2012-0182, MS12-064
Vendor Advisory	http://technet.microsoft.com/security/bulletin/MS12-064
Risk Assessment	Critical Vulnerability
Threat Impact	Remotely exploitable vulnerability that could allow an attacker to gain full control of an unprotected system.
Affected Products	Microsoft Word 2007 Service Packs 2 and 3
Corero Products	IPS 5500 E-Series and later.
Associated Rule	tln-106527
Associated Rule Set	This rule is automatically enabled in the "Recommended Client Protection" rule set.
