

Threat Update Service* Advisory

Protection Pack 2014-02-12-01 Released February 12, 2014

Purpose: The Corero Security Active Response Team has issued this Prevention Advisory to protect customers against known attacks targeting the Microsoft XML Core Services CVE-2014-0266 Information Disclosure Vulnerability.

Issue: Internet Explorer does not properly enforce cross-domain policies. This could allow an attacker to gain access to sensitive information by accessing content from different domains to read files on the local file system.

Recommended Action: Apply the specified protection pack (or any later one) and ensure the associated rule is used to inspect traffic to the affected product infrastructure.

Issue Identifier	CVE-2014-0266, MS14-005
Advisory	http://technet.microsoft.com/en-us/security/bulletin/ms14-005
