

## Threat Update Service\* Advisory

### Protection Pack 2014-01-08-02 Released January 9, 2014

**Purpose:** The Corero Security Active Response Team has issued this Prevention Advisory to protect customers against known attacks targeting the Apache Solr SolrResourceLoader Directory Traversal Vulnerability.

**Issue:** A directory traversal vulnerability exists in Apache Solr. This could allow an attacker to read arbitrary files via a dot dot or full pathname in the 'tr' parameter to solr/select/ and gain access to sensitive information.

**Recommended Action:** Apply the specified protection pack (or any later one) and ensure the associated rule is used to inspect traffic to the affected product infrastructure.

<b>Issue Identifier</b>	CVE-2013-6397
<b>Advisory</b>	<a href="https://issues.apache.org/jira/browse/SOLR-4882">https://issues.apache.org/jira/browse/SOLR-4882</a>
<b>Risk Assessment</b>	Critical Vulnerability
<b>Threat Impact</b>	Remotely exploitable vulnerability that could allow an attacker to gain access to sensitive information on an unprotected system.
<b>Affected Products</b>	Apache Solr before 4.6
<b>Corero Products</b>	IPS 5500 E-Series v6.60 (build 047 and later), v6.61 (build 021 and later), v6.80 (build 035 and later).
<b>Associated Rule</b>	tln-106767
<b>Associated Rule Set</b>	This rule is automatically enabled in the "Recommended Server Protection" rule set.
