

Threat Update Service* Advisory Protection Pack 2014-01-08-02 Released January 9, 2014

Purpose: The Corero Security Active Response Team has issued this Prevention Advisory to protect customers against known attacks targeting the HP LoadRunner Virtual User Generator CVE-2013-4837 RCE Vulnerability.

Issue: A directory traversal vulnerability exists in the copyFileToServer method in HP LoadRunner. This could allow an attacker to execute arbitrary code on the victim's machine and possibly take complete control of an affected system via a malicious file upload.

Recommended Action: Apply the specified protection pack (or any later one) and ensure the associated rule is used to inspect traffic to the affected product infrastructure.
