

## Overview

---

Introducing our latest Security Services, tailored to boost the SmartWall ONE™ solution's defense against DDoS attacks. With DDoS attacks becoming more frequent, bigger, and more complex, it's essential to keep defenses sharp. **That's where our SecureWatch Services come in.**

SmartWall ONE is already a top-tier, automated defense system that can handle massive attacks. But even the best defenses can benefit from a little upkeep. Our new SmartWall ONE services ensure you have the strongest protection possible.

## Annual Subscriptions

---

### SecureWatch DDoS Fully Managed Service:

Imagine having an expert team dedicated to managing your DDoS protection around the clock. This service does just that, offering peace of mind with a fixed yearly subscription.

### IP Intelligence Service:

Boost SmartWall ONE's defense with precise Geo & ASN insights and country-specific traffic control, all updated live for superior network protection and integration.

### SecureWatch DDoS Intelligence Service:

Think of this as your AI co-pilot, proactively feeding SmartWall ONE with the latest defenses, stopping new threats before they hit.

### SecureWatch Attack Time Service:

Need expert assistance on the fly? This on-demand service lets you tap into our SecureWatch Security team for SmartWall ONE-related actions, ensuring you're never left in the lurch.

### Advance Hardware Replacement Service:

Minimize downtime with rapid replacement of faulty units, ensuring your defenses remain strong without interruption.

**Maximize Your SmartWall ONE Performance with SecureWatch Services.**

## One-Time Fees

---

### SecureWatch Emergency Response Service:

When DDoS attacks strike, this service is your rapid response team, available per incident to mitigate threats swiftly.

### SecureWatch Forensic Investigation Service:

After an attack, understanding what happened is crucial. This service provides in-depth investigation and reporting on specific events.

### SecureWatch Period of Interest Service:

Have an event that needs extra protection? This service boosts your DDoS defenses during crucial times, protecting your critical business operations.

### Educational Class:

Empower your team with knowledge through a 2-day training class, enhancing your internal DDoS defense capabilities.

## Bespoke SOWs

---

### Customized Professional Service:

For unique needs, this service offers tailored solutions to fit your specific DDoS protection requirements.

### SecureWatch Security Optimization Service:

Think of this as your DDoS protection tune-up, optimizing your system's security setup to ensure maximum defense capability.

### SecureWatch Audit Service:

Evaluate your DDoS readiness with a thorough audit, ensuring your defenses are solid and prepared.

### Installation and Deployment Services:

Get your DDoS solutions up and running smoothly with expert installation and deployment of both hardware and software components.

Each service is designed with your security and convenience in mind, offering a range of solutions to ensure your network remains resilient against DDoS threats.
