Last Date of Support	The last date to receive service and support for the product. After this date, all support services for the product are unavailable	January 1, 2029

Product Migration Options

The Zero-Power Bypass 100G, 10G, and 1G appliances will continue to be supported for use with SmartWall Network Threat Defense (NTD) devices all the way through to the Last Date of Support.

During this End-of-Life period, Corero customers can seamlessly upgrade to the latest NTD devices, with built-in zero-power bypass network interfaces, using their existing management (CMS) and analytics (SWA) applications. Upgrading delivers the latest generation of protection for 10Gbps and 100Gbps bypass protected links with the NTD3400; or customer can make the transition to a fully software-based solution, using SmartWall's Network Threat Defense Virtual edition (vNTD) running on their own server hardware.

If you need more information regarding this announcement or your migration options please contact your regional sales manager, or Inside Sales at info@corero.com.
