

SecureWatch Managed Services Resilient to Recent AWS Outage

Advisory ID: 10202025-1
Published: 20 Oct 2025
CVEs: N/A

Summary

Amazon Web Services (AWS), a leader in the cloud infrastructure market, reported a major outage on Monday October 20, 2025, that affected many of its hosted customers.

Corero is pleased to reassure our customers and partners that SmartWall ONE™ solutions and SecureWatch Managed Services were unaffected by the recent AWS outage. Our solutions and services continued to operate normally throughout the event, with no disruption to performance or availability.

Impact Statement

No impact was observed on Corero's SmartWall ONE solutions or our SecureWatch Managed Services. All systems remained fully operational, supported by Corero's resilient infrastructure and redundant architecture, which are designed to mitigate risks associated with third-party service interruptions.

Recommended Actions

No action is needed from customers at this time.

Corero continues to monitor its infrastructure and service delivery to ensure ongoing stability and performance.

Corero recommends following best practice, whenever possible, to deploy a resilient architecture to reduce risk and deliver maximum business continuity.

Please contact your Corero support representative if you have any concerns.
